

Resume Analysis Report

Resume Score: 100/100

Job Match Score: 100%

Skills Detected

- Python
- Machine Learning
- Streamlit
- Sql
- Pandas
- Numpy
- Git
- Github

Missing Skills

No missing skills detected.

AI Feedback

Here's a concise review:

1. Strengths

- * **Relevant Keywords:** Good use of AI, ML, Deep Learning, NLP, Generative AI, Prompt Engineering, Agentic AI.
- * **Project Variety:** Projects demonstrate practical application in resume analysis, NLP, and financial data.
- * **Tool Exposure:** Lists key libraries like TensorFlow, PyTorch, Scikit-Learn.
- * **Clear Ambition:** Professional summary clearly states interest in AI/ML.

2. Weaknesses

- * **Vague Professional Summary:** Too broad with many interests (Quant Finance, Algorithmic Trading) that might dilute focus for a pure AI Engineer role. Lacks specific achievements or impact.
- * **Lack of Quantification:** Projects lack metrics, results, or specific technologies used beyond Python/Streamlit.
- * **Missing Education Details:** Institution name and location are critical.
- * **"Suggested" Certifications:** Listing "Suggested" certifications is not standard; only include completed ones.
- * **Conciseness:** Could be more impactful with fewer broad interests and more depth in relevant areas.

3. Missing Skills

- * **Cloud Platforms:** AWS (Sagemaker), Azure ML, GCP (AI Platform)
- * **MLOps Tools:** Docker, Kubernetes, MLflow
- * **Big Data Technologies:** Spark, Hadoop
- * **Databases:** NoSQL (MongoDB, Cassandra) beyond just "SQL"
- * **Deployment/Web Frameworks:** Flask/Django (if building web services beyond Streamlit)
- * **Experiment Tracking:** Weights & Biases
- * **Version Control for ML:** DVC

4. ATS Improvement Suggestions

- * Expand Project Details: Use bullet points with action verbs, quantify impact (e.g., "improved accuracy by X%", "processed Y data points"), and list specific technologies used for each project.
- * Tailor Summary: Focus the professional summary exclusively on AI Engineer skills and aspirations, providing 1-2 key achievements or unique value propositions.
- * Standardize Education: Include university name, degree, major, and graduation date clearly. GPA if impressive.
- * Remove "Suggested" Certifications: Only list actual completed certifications. If none, remove the section entirely or work on obtaining relevant ones.
- * Keyword Repetition: Ensure relevant keywords are naturally integrated into project descriptions and the summary, not just listed in skills.
- * Formatting: Use clear, consistent headings. Ensure easy readability.
